

COIS 3420 Assignment 1 Question 1 Testing

Laura Mann | 0582478

Google Chrome on Mac

The following photos are of my site running on Google Chrome on a Mac. Obviously, it works flawlessly because Chrome is awesome.

About Me

"Hi, my name is Laura Mann. I'm in my second year of computer science at Trent University. I'm interested in web design, software development, and data mining. I'm hoping to pursue a career in agriculture technology. I like travelling, cooking, building, and exploring."

Safari on Mac

The following photos are of my site running on Safari on a Mac. Most things worked perfectly fine, the only problem that occurred was my `<p>` text in the boxes on my Education page. Since they were also links, they were showing up blue (when I wanted them to stay white). I was able to fix it by selecting the class of the box, and `<p>` and setting the color to white.

Firefox on a Mac

The following photos are of my site running on Firefox on a Mac. The only issue is that the little icons in my buttons on my home page are not positioned the same. Everything else looked fine.

About Me

A screenshot of the 'About Me' section of the website. It features a black and white portrait of a young woman with long hair. To the right of the portrait is a text box containing her bio: "Hi, my name is Laura Mann. I'm in my second year of computer science at Trent University. I'm interested in web design, software development, and data mining. I'm hoping to pursue a career in agriculture technology. I like travelling, cooking, building, and exploring." Below the bio are three social media links: 'Resume' (with a download icon), 'LinkedIn' (with a linked-in icon), and 'Github' (with a GitHub icon). At the bottom of the browser window, a status bar displays a message from Mozilla: 'Firefox automatically sends some data to Mozilla so that we can improve your experience.' and a 'Choose What I Share' button. The Mac OS X Dock is visible at the very bottom, showing various application icons.

Volunteer Experience

Internet Explorer on Windows

The following photos are of my program running on Internet Explorer 11 on Windows. I had similar issues to Safari in that my links were not being coloured properly, but I was able to fix it by specifying the colour with more specific selectors in my CSS. The spacing is also a bit off with IE, as you can see below:
